

NEXT WAVE OF GROWTH

Neelkanth Mishra,
Chief Economist, Axis Bank;
Member, PMEAC

- “India must stay the course amid global volatility,” said Mishra. Responding to Donald Trump’s tariff imposition, he said the signs are ominous, but this is not an attempt to take away from India. He also acknowledged the absence of the private capex boom

INDIA POWERING ITS AI FUTURE

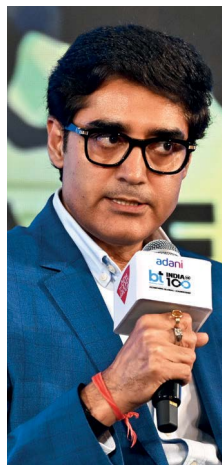

(From left) **Ganesh Gopalan**, CEO & Co-founder, Gnani.ai
Saurabh Kumar Sahu, MD & Lead—India Business, Accenture
Abhishek Singh, Additional Secretary, Meity; CEO, India AI Mission
Subramanian Udaiyappan, Director—Advanced Technology Solutions, Fortinet

- Discussing the future of AI and India’s position in the global ecosystem, Gopalan said AI will aid in solving problems—in government and in industry—for India and for the world

- Sahu reinforced India’s importance, saying, “From both external and internal perspectives, India is well placed. However, the pace of growth [in AI] has scope for improvement”

- On the challenges brought by AI, Udaiyappan said, “There are many risks that come with AI and AI itself can be used to mitigate those risks”

- According to Singh, Indian talent and start-ups have a big role to play in the world of AI
