Unsoo Kim. Garg says if the company continues to introduce new technologies, body styles and features, customers will remain interested in its cars.

Analysts say Hyundai's enhanced product pipeline will allow it to maintain an edge in conventional as well as emerging segments. "The phased rollout of these models, including new versions of popular models and new electric offerings, is strategically designed to balance market demands with evolving consumer preferences. The focus on both ICE and EV vehicles will ensure that Hyundai remains relevant in the transition

towards greener mobility while maintaining a strong presence in the mass market," says Sharma. "Hyundai has a solid presence in compact car and premium vehicle segments, the two areas where competition is more limited than in SUV and EV segments," he adds. Emkay Global expects Hyundai Motor India's utility vehicle sales in the domestic passenger vehicle market to rise 16.5% in FY26 and 16.3% in FY27.

What about small cars? While the category is important, we plan to focus mostly on SUVs, says Garg. In India, the sedan segment has shrunk, from 18.9%
