in FY17 to 7.8% in FY25. “While SUVs are growing in popularity, hatchbacks and sedans continue to play a vital role in the market and our portfolio,” says Unsoo Kim. With models like Verna (mid-size sedan) and Aura (sub-four metre sedan), the sedan segment accounts for 12.7% of Hyundai’s portfolio. Its share in the entry sedan segment increased from 9% in FY20 to 20% in FY25. Its mid-size sedan segment market share, however, declined from 25% in FY20 to 22% in FY25.

Meanwhile, hatchbacks account for 18% portfolio with models like Grand i10 Nios (entry-level/

compact hatchback) and Exter (micro-SUV/hatchback crossover). Hyundai’s share in premium hatchbacks fell from 41% in FY15 to 20% in FY25. Hatchbacks have seen the sharpest demand shrinkage in the domestic passenger vehicle segment—from 47.4% in FY17 to 24% in FY25.

“Despite strong offerings in i10 and i20, Hyundai’s share in premium hatchback has declined. This even as competition has thinned with the exits of Ford, GM and Fiat, along with withdrawal of products by Honda, Nissan, Renault and VW. The decline may be attributed to relatively higher price hikes by Hyundai driven by feature additions and possibly margin optimisation,” says UBS.

However, unlike rival Maruti Suzuki, which continues to stress the importance of small cars, Hyundai is less focused on the segment. Garg says customers have graduated from small cars to SUVs. “As more and more regulations come in and customers become younger and aspirational, it (the shift) is obvious. It has happened across the world, and it is happening in India as well,” he says.

Except for Creta, a fair chunk of Hyundai’s portfolio is struggling. Verna, Venue, Exter and Tucson have failed to strike a chord with consumers. Take May 2025 sales. Exter is down 23%, Venue 19%, Verna 33%, and Tucson 64% compared to May 2024. Even Alcazar, once seen as Hyundai’s answer to mid-size SUVs such as Mahindra XUV700, Tata Safari and MG Hector Plus,

UNLIKE RIVAL MARUTI SUZUKI, HYUNDAI IS LESS FOCUSED ON THE SMALL CAR SEGMENT

has not had many takers. UBS says a potential launch of Hyundai Bayon (positioned below Creta) may help. Additionally, in large utility vehicles, a new model to compete with M&M XUV700 could help Hyundai gain share in this emerging space.

Hyundai’s domestic utility vehicle market share shrunk from 20.1% in FY22 to 16.9% in FY25, says Emkay Global. UBS says the compact SUV segment’s contribution in Hyundai’s sales fell from 24% in FY20 to 15% in FY25. The share of the mid-size SUV market dipped from 41% to 30%. Large SUVs rose from 1% to 5%.
