

CHANGING LIVES IN JHARKHAND'S GODDA: HOW THE ADANI FOUNDATION IS POWERING HOLISTIC DEVELOPMENT

From education to healthcare and empowering people, the CSR arm of the Adani Group is paving way for a better future in this backward district.

Tucked away in northern Jharkhand, Godda has long struggled with limited access to education, healthcare, and livelihoods. With a population of over 1.3 million, the district has historically ranked low on human development indices. But change is underway — powered by a blend of industrial progress and corporate social responsibility (CSR). Godda is home to the Adani Group's ultra-supercritical thermal power plant, a major infrastructure project aimed at exporting 1,600 MW (megawatt) of electricity to neighbouring Bangladesh. Beyond its technological sophistication and economic importance, the project has become a catalyst for comprehensive community upliftment, driven by the Adani Foundation, the CSR arm of the Adani Group.

Beyond Business: A Commitment to Communities

While the power plant stands as a symbol of India's growing energy capabilities, the Adani Foundation is quietly scripting a transformational story in the villages surrounding the site — focusing on five key pillars of development: education, healthcare, livelihoods, infrastructure, and sustainability.

1. Education: Empowering the Future

Recognising education as the cornerstone of empowerment, the Foundation has:

- Renovated and upgraded schools with classrooms, washrooms, drinking water facilities, and electrification — benefitting nearly 500 students annually.
- Supported nine Kasturba Gandhi Balika Vidyalayas (KGBVs), impacting hundreds of underprivileged girls.
- Launched evening coaching centres and entrance

exam programmes, including for Grade X students.

- Introduced the Gyanodaya project, bringing smart classrooms and e-learning to over 70,000 children.
- Begun construction of a secondary school with modern facilities, set to open in 2026-27.
- The Godda district administration has formally recognised the Adani Foundation for its outstanding contributions to the education sector.

2. Healthcare: Mobile Clinics and Specialist Care

Addressing critical gaps in rural health services, the Foundation's healthcare initiatives have reached 80,000+ patients annually across 137 villages, offering:

- Mobile health units providing daily medical care and maternal-child services.
- Specialist health camps offering pathology, diagnosis, and medicines.
- Vaccination and awareness drives for preventive healthcare.

3. Sustainable Livelihoods: Skills and Self-Reliance

To create sustainable income streams and job readiness, the Foundation runs:

- Mushroom cultivation training for over 300 women, organised through self-help groups (SHGs).
- Skill development programmes in tailoring, masonry, and electrical trades — empowering 2,000+ women and girls.
- Vermicomposting and improved agricultural practices, helping farmers increase yield and crop quality.

“Giving back to society is not an act of charity. It is our duty, our responsibility, and above all, a way of being.”

Dr. Priti Adani, Chairperson,
Adani Foundation

- Cattle health camps in collaboration with the Animal Husbandry Department, serving livestock-owning families.

4. Infrastructure: Laying the Foundations for Better Living

In partnership with local authorities, the Foundation has:

- Improved water access by installing/repairing hand pumps and borewells, benefitting 8,600 residents.
- Built model bathrooms and soak pits for better sanitation.
- Constructed and upgraded rural roads, installed
