

Balanced Scorecard

To give a balanced picture of how companies in the **BT500** list are performing, we created a score based on three factors—revenue growth, market capitalisation, and profitability. Revenue growth shows how fast a company is growing, market capitalisation reflects the level of trust investors have placed in the company, while also giving weight to how efficiently a company runs its operations and how sustainable its performance is over time. By combining these factors, we provide a balanced and fair assessment of corporate performance. Here are the company rankings based on this score.
