nesses across dimensions. “ONGC, as one of India’s largest Maharatna companies, has the financial strength and institutional capacity to pursue large investment projects and strategic initiatives,” he says. These could be deepwater exploration or enhanced oil recovery (extracting oil from after primary and secondary stages) in mature oil fields.

THE ROUND-UP

Vinod Nair, Head of Research, Geojit Financial Services, says cost control also played a role in India Inc’s performance in FY25. “GDP took off and led to an uptick in volumes. But global inflation also fell,” he says. For example, benign crude oil prices lowered manufacturing and logistics costs. “A lot of companies with focus on exports gained from a depreciating rupee,” says Nair.

The topper on the list since FY15, RIL, has embarked

on a massive diversification drive. The shift from the traditional oil and gas business to B2C—retail and digital—clearly helped. The two together accounted for 52% of the conglomerate’s earnings before interest, taxes, depreciation and amortisation (EBITDA). Chairman and MD Mukesh Ambani said after the FY25 results that the year had been challenging for the global business environment with weak macro-economic conditions and shifting geo-political landscape. “Our focus on operational discipline, customer-centric innovation and fulfilling India’s growth requirements helped us deliver a steady financial performance during the year,” he said. Analysts remain optimistic about RIL’s multiple businesses. “It is a strong EBITDA generator. A sector like retail is still underpenetrated, leaving huge headroom for growth. They have the ability to not just invest but back big-ticket projects like telecommunications,” says Vinit Bolinjkar, Head
