Power distribution companies have improved profitability by boosting collections and modernising infrastructure

In Short

+

India's peak power demand is expected to hit 388 GW by FY32, from 240 GW in FY25

+

The country will need to increase its power generation capacity to 780 GW by FY30

+

This means an effective CAGR of 11% in power-related capital expenditure till FY30

+

However, there are challenges, not least the execution delays, coal and gas price fluctuations and tariff structures
