

Deepak Jain (DJ) On Balancing Financial Precision With Bold Retail Innovation

The Chartered Accountant who traded liquor balance sheets for India's premium intimate-wear market — and turned amanté into its breakout name by treating instinct and arithmetic as equal partners.

Not many Chartered Accountants end up shaping how India dresses. Deepak Jain — popularly known as DJ to almost everyone — spent the first decade of his career across liquor, garment manufacturing and retail, with early stints in the drinks business at Shaw Wallace, the UB Group and Diageo India. Then in 2014 he walked into amanté as CFO, and the spreadsheets gave way to something less expected: building a premium intimate-wear brand.

He didn't stay in finance for long. As CEO, DJ has transformed amanté from a lingerie brand into a broader lifestyle proposition spanning ath-leisure, sleepwear, loungewear and other adjacent categories. Under his leadership, the brand has consistently outperformed category growth and national competitors, emerging as one of the fastest-growing players in premium intimate wear and establishing leadership positions in both India and Sri Lanka. He has also driven a significant expansion of the brand's retail footprint, making amanté accessible to a much larger consumer base.

Those who work with him often speak of his willingness to back ideas, embrace change and empower teams to think beyond convention. It is this blend of commercial discipline and entrepreneurial instinct that has helped shape amanté into one of the most recognised names in the category, while establishing DJ as a respected leader in India's retail and fashion industry.
