
RIMOWA Essential

► **IF YOU BELIEVE** your luggage needs to reflect your personality, and discretion is not the name of the game, RIMOWA's latest Essential Cabin collection, introduced in vivid orange and magenta hues, is meant for you! For decades, luggage has tended towards shades of black, navy and silver—chosen as much for practicality as discretion. However, RIMOWA's latest Essential Cabin collection in orange and magenta brings a welcome sense of personality to the baggage carousel while retaining the German brand's emphasis on engineering. The polycarbonate carry-on is lightweight, durable and fitted with multi-wheel mobility and a telescopic handle. It is designed for frequent travel rather than the occasional escape. After all, when your baggage has its own personality, it adds to your airport look and needs to be used more often.

TUMI Dual Access Expandable Carry-On

► **TUMI HAS BUILT** its reputation on reliability, something that is non-negotiable for frequent travellers. The Dual Access Expandable Carry-On focuses on small efficiencies that make life simpler when you are on the move. Its dual-entry design allows access to essentials without fully opening the case, while an expandable compartment provides additional flexibility for all that unplanned shopping. Constructed from the brand's signature ballistic nylon and equipped with features such as an AirTag pocket and charging capability, it is designed as your trusted airport companion.
