EUME Aluminium Sunburn Cabin—Limited Edition

► **IN AN ERA** of largely interchangeable luggage, EUME's Aluminium Sunburn Cabin seeks attention. Its gold-toned aluminium shell, produced in a limited run, is more apt for your Instagram page than being tucked away in an overhead bin. But don't be fooled by its good looks; beneath the polished exterior are features familiar to and required by seasoned travelers: TSA-approved locks, compression systems and smooth-rolling wheels. Here is a luggage designed to be part of your broader personal style. Available in multiple colours.

Nappa Dori Wingman Luggage Cabin Bag

► **THE WINGMAN CABIN** from Nappa Dori blends durability with understated design. Built with a lightweight polycarbonate shell reinforced by an aluminum frame, the carry-on is accented with leather details that evoke the brand's vintage-inspired aesthetic. Practical features include smooth-rolling wheels, a three-stage telescopic handle, a TSA-approved lock, and interior compression straps to streamline packing. A customisable name tag further enhances its appeal.
