

POLYVINYL CHLORIDE (PVC)

DOMESTIC CONSUMPTION OF PVC HAS SURGED TO AROUND 4.5 MILLION METRIC TONNES ANNUALLY, CREATING A SIGNIFICANT SHORTFALL THAT HAS BEEN INCREASINGLY MET THROUGH IMPORTS. THIS STRUCTURAL GAP HAS POSITIONED INDIA AS THE LARGEST PVC RESIN IMPORTER GLOBALLY, WITH IMPORTS MAKING UP NEARLY TWO-THIRDS (66%) OF ITS TOTAL DEMAND OF ABOUT THREE MILLION METRIC TONNES LAST FISCAL YEAR.

TOLUENE

THE AROMATIC HYDROCARBON, DERIVED PRIMARILY FROM PETROLEUM SOURCES, REMAINS A CORNERSTONE OF THE INDIAN CHEMICAL INDUSTRY. ITS WIDESPREAD APPLICATION IN PAINTS, COATINGS, ADHESIVES, PHARMACEUTICALS, AND PETROCHEMICAL DERIVATIVES ENSURES RELEVANCE ACROSS SECTORS. INDIA IMPORTED 533KT TOLUENE IN FY25.

MIXED XYLENES

IT IS USED TO MANUFACTURE POLYETHENE TEREPHTHALATE AND POLYESTER FIBRES. INDIA'S PACKAGING AND TEXTILE INDUSTRIES RELY HEAVILY ON THESE DERIVATIVES, AND THE COUNTRY'S PETROCHEMICAL SECTOR IS UNDERGOING SIGNIFICANT EXPANSION TO MEET THIS DEMAND. THE ELECTRONICS INDUSTRY ALSO CONTRIBUTES TO THE RISING DEMAND—THESE ARE USED IN THE PRODUCTION OF PRINTED CIRCUIT BOARDS AND ELECTRONIC COMPONENTS.

MONO ETHYLENE GLYCOL (MEG)

INDIA'S PUSH TOWARDS PETROCHEMICAL SELF-RELIANCE IS RESHAPING THE MEG LANDSCAPE. AS A CRITICAL RAW MATERIAL IN THE PRODUCTION OF POLYESTER FIBRES, PET RESINS, AND AUTOMOTIVE COOLANTS, MEG PLAYS A FOUNDATIONAL ROLE IN INDIA'S TEXTILE, PACKAGING, AND AUTOMOTIVE SECTORS. THE COMMISSIONING OF IOCL'S MEG PLANT AT ODISHA MARKS A SIGNIFICANT MILESTONE.

— CAPACITY — PRODUCTION — IMPORTS ● DEMAND GROWTH
