

E' IN CSR

N REMAINED A WEAK CSR PRIORITY?

ILLUSTRATIONS BY RAJ VERMA

THE PLAYBOOK

In FY25, Indian companies spent nearly ₹35,000 crore on CSR. Of this, just ₹2,430 crore—less than 7%—went towards environmental sustainability and ecological balance

Over the last 10 years, environment has accounted for only 6.6% of cumulative CSR spending

In FY25, education alone took 35% of the total, nearly five times the share that went to the environment

Rural development and livelihood enhancement each got roughly 7%

Even when environmental CSR spending does happen, continuity often weakens after initial intervention
