

cooking stoves, and waste plastic road technology.

At the Bina Refinery, BPCL has commissioned a five MW electrolyser with a production capacity of 2.1 TPD of green hydrogen. Moreover, the Bina Refinery has progressed biomass-based green hydrogen projects, including a 1,500 MT per annum plant under implementa-

tion. At the Kochi Refinery, BPCL commissioned a green hydrogen refuelling station in collaboration with Cochin International Airport Ltd.

Further strengthening India's biofuel value chain to meet the demand for flex fuel, BPCL has commissioned a 100 KLD 1G Bio-Ethanol plant at Bargarh, Odisha,

utilising 230 MT of rice grain per day. In addition, BPCL commissioned a 100 KLD 2G Ethanol plant utilising approximately 480 MT of rice straw per day as feedstock.

The company has developed Highway Fast Charging Corridors covering over 45,000 km to strengthen EV charging infrastructure. Strategic partners like Ola Electric, Race Energy, Hero MotoCorp, and VoltUp have been brought on board to establish fast charging and battery swapping pilots across India. There was a significant increase in the number of solarised Retail Outlets (ROs) during the year, with the company solarising 7,563 ROs, taking the cumulative total to 19,807.

This expansion reinforces the company's commitment to sustainable operations, clean energy adoption, and reducing carbon emissions across its retail network. Reducing the adverse impact of plastic waste, BPCL has developed a Waste Plastic Road (WPR) Process to enable sustainability through the effective utilisation of plastic waste. Integrating plastic waste into road construction enhances the durability of the roads and prevents road damage due to seepage of rainwater.

BPCL has undertaken extensive in-house R&D efforts to develop catalytic solutions for CO₂ conversion into value-added chemicals and fuels, including formic acid, methanol, and sustainable aviation fuel (SAF). These initiatives position BPCL at the forefront of decarbonization technologies while supporting long-term business sustainability. **BT**
