

T HERO MOTOCORP, India's largest two-wheeler manufacturer by volume, sustainability

is a key metric that's incorporated in every employee's performance goals.

"In a way, everybody's compensation is linked to this. All people managers track these goals as part of KPIs (key performance indicators)," Harshavardhan Chitale, who took over as the CEO of Hero MotoCorp in January, tells *BT*. It has been recognised as the Most Sustainable Company in Automobiles in the category of Sectoral Excellence in Manufacturing in this year's *BT* India's Most Sustainable Companies.

Even the company's board reviews sustainability targets every quarter, he adds.

54 | It's no wonder then that Hero MotoCorp's ambitious goal of being zero-waste-to-landfill was achieved in 2024, well before the target timeline of 2025. For an automaker with a footprint of six manufacturing plants, that is no mean feat. To achieve that goal, the company started converting hazardous waste such as paint sludge into industrial primer.

The company also achieved its target of a water positivity rate of 500% in 2025, thanks to its pond development initiatives. "Hero MotoCorp harvests five times more water than it consumes," he says. The water positivity rate refers to the amount of water replenished. In this case, the company says it has replenished more water than it consumes.

To reduce its carbon footprint, Hero MotoCorp plans to use more renewable energy going forward. About 40% of its energy needs are met through renewables, either

DRIVING THE CHANGE

From staff performance goals to driving the EV charge, Hero MotoCorp is racing ahead in its quest to build a sustainable business
