

THE COMPANY IS DRIVING HIGH LEVELS OF WATER RECYCLING AND REUSE

WITH RENEWABLES NOW accounting for 59% of JSW Energy's total power generation portfolio, the company is pursuing a balanced energy strategy that combines clean energy expansion with efficient thermal capacity to ensure grid stability and reliable round-the-clock power as India accelerates its energy transition.

The company has been recognised as the Most Sustainable Company in Power Generation in the category of Sectoral Excellence in Manufacturing in this year's BT India's Most Sustainable Companies

The strategy comes as JSW Energy commissioned 250 MW of wind, solar and hydro capacity, taking its total operational capacity to 13.7 GW. This marks the early phase of its planned ₹20,000-crore capital investment programme for the year, with a target to add 3 GW of green energy capacity.

"At JSW Energy, sustainability is central to how we define growth. We have embedded sustainability across the full value chain—from capital allocation and project development to operations and stakeholder engagement," says Sharad Mahendra, Joint Managing

TOWARDS ROUND THE-CLOCK SOLUTIONS

JSW Energy is pairing green expansion with storage, hydrogen and thermal capacity to deliver reliable, round-the-clock power
