Dr. Uday Shanker Awasthi: The Architect of India's Nanofertiliser Revolution

Dr Awasthi has revolutionised the farming sector through his pioneering use of modern technology- Nanofertiliser. In the annals of India's agricultural history, Dr Awasthi, is the second Indian to receive the coveted and extremely prestigious award, Rochdale Pioneers Award 2024, after Father of the White Revolution (Milkman of India) - Dr. Verghese Kurien, the recipient of the 2001 Award. Popularly known as 'India's Fertiliser Man', Dr Awasthi's legacy is firmly established as the Father of Nanotechnology in Agriculture.

Dr. Uday Shanker Awasthi's visionary zeal and relentless pursuit of innovation spanning more than 50 extraordinary years is a testament to his prowess of perseverance, penchant for innovation and the unwavering commitment to farmers' welfare besides playing a

defining role in ensuring food security of the nation. The chemical engineer from IIT-Banaras Hindu University took over the reins of IFFCO in 1993 as the Chief Executive Officer, ushering in a new era of transformation for the cooperative placing it on the global

map. The people's CEO, reminiscing on the choice of IFFCO, the world's largest agricultural cooperative, as a place to work, Dr Awasthi mentioned in an interview, "It was a conscious decision as I knew I would get here a chance to serve the wider mankind. IFFCO has
