

WAIT FOR THE NEXT

Two solid flagship phones, the big boy Samsung Galaxy S25 Ultra and the small-yet-mighty Galaxy S25, were launched recently. But the AI-centric features may not be enough to justify an upgrade this year

BY PRANAV DIXIT

Heavy on AI

Samsung Galaxy S25 Ultra has a strong focus on artificial intelligence (AI). One of the standout features is its light weight; it is lighter by about 15 grams, making it more comfortable to hold, especially for extended use.

The camera is the same as the last year's model, with the only change being a 50MP ultrawide sensor replacing the
