TVS Apache RTX 300 this year. TVS Motor, through its partnership with BMW Motorrad, already had a presence in the market for bikes above 300cc capacity such as the BMW G310 R and BMW 310 GS. These models are manufactured at the TVS facility in Hosur, Tamil Nadu, to quality specifications by BMW.

The company is simultaneously scripting a turnaround story for the UK motorcycle brand Norton, synonymous with premium bikes. TVS Motor purchased the 126-year-old brand in 2020 and plans an investment of £200 million pounds.

TVS will be launching six products including an electric Norton motorcycle in the next two-three years.

The company will be launching the first revamped Norton bike in the second half of this year. Moving ahead, TVS Motor also has plans for expansion in South-east Asia, South America and the industrialised markets of Europe and America.

Rahul Agarwal, auto sector lead analyst at HDFC Securities, says: "TVS's ability to balance growth and profitability makes it a strong mid-term investment bet. The company's EBITDA margin growth and robust export pipeline set it apart from the competition."

Even as TVS Motor scouts overseas markets, it is not diluting its focus on the domestic two-wheeler market,

in which it plans to launch a raft of products in the coming months. The company accounts for more than 30% market share in the above 100 cc motorcycle segment in India. In scooters, the company's market share, through Jupiter, stands at 25%, second only to Honda, which has a 43% market share.

In CY24, TVS Motor sold 3,238,852 two-wheelers.

TVS Motor plans to scale up its financial services business. "Now we have an AUM of about ₹33,000 crore in our NBFC. And in the next two years, we will look to go closer to our target of ₹50,000 crore," says Venu, who is also Managing Director of TVS Holdings Ltd, the group holding company, and Chairman of TVS Credit Services, the NBFC arm. AUM is short for Assets Under Management. NBFC stands for Non-Banking Financial Company.

Venu observes that financial inclusion and penetration in India offers a massive opportunity for TVS Credit Services to grow in a market where it already has 30 million customers. "The digital payments infrastructure is in place. We are a large financier of cell phones and consumer loans, and we will look to get into newer segments like gold and home loans as well as we expand our franchise," says Venu. **BT**
