

## FINTECH 2.0: WHAT'S NEXT?

(From left)

**Prashant Muddu, MD & CEO, Jocata**

**Gunit Chadha, Founder, APAC Financial Services**

**Upasana Taku, Co-founder & CFO, MobiKwik**

» "Now that it is becoming available, everyone is considering how to make sense of such a huge amount of data and drive innovations towards that," Muddu said.

» "In lending, we have seen fintechs operating much more in the urban space. But when it comes to the more difficult business segments, in the

MSMEs, semi-rural space, omni-channel presences are quintessential," Chadha said.

» Taku said fintechs' next leg of growth would be about companies targeting specific, untapped segments of India. "We will see more specific and niche plays rather than an universal play."

## DEPOSITS & FLOWS: THE MACRO CHALLENGE

(From left)

**Siddharth Zarabi, Editor, BT**

**Mridul Saggarr, Professor & Head of the Centre for Macroeconomics, Banking & Finance, IIM Kozhikode**

**Madan Sabnavis  
Chief Economist, Bank of Baroda  
Madhavi Arora, Chief Economist,  
Emkay Global**

» "CRR is to slow down the pace of credit creation if inflation is high," Saggarr said.

» "We should not be looking at CRR as a measure of providing liquidity to the system. It could be used in a more meaningful manner," Sabnavis said.

» "The LCR norms are too tight; there could be leeway... in terms of easing some liquidity from the CRR," Arora said.
