

Empowering India's Manufacturing Landscape with Smart Automation Technologies

Sanjeev Srivastava
Head of Automation
Delta Electronics India Pvt Ltd

The global manufacturing sector is undergoing a revolutionary transformation driven by Industry 4.0 technologies. Automation, coupled with cutting-edge advancements in the Internet of Things (IoT), Artificial Intelligence (AI), and Machine Learning (ML), is reshaping the production landscape, making it more efficient, adaptable, and intelligent. India, being one of the fastest-growing industrial economies, is witnessing rapid adoption of these smart manufacturing technologies, and

Delta Electronics India is playing a crucial role in this journey.

Delta with its mission 'To provide innovative, clean, and energy-efficient solutions for a better tomorrow', invests in sustainable technologies to ensure automation solutions increase efficiency but also consume less energy and leave less carbon footprint. New products allow a greener process of manufacturing with reduced energy consumption. commitment to Decarbonization, Innovation &

Automation and Delta's goals to achieve- 100% renewable electricity in global operation by 2030, carbon neutrality by 2030, NetZero by 2050.

The Rise of Smart Manufacturing

Industry 4.0 represents a new era of digitalization, where automated systems and intelligent technologies work in tandem to optimize production processes. Traditional manufacturing processes, which once relied heavily on manual operations, are now being replaced by data-driven decision-making,
