

Jaeger-LeCoultre-Reverso One Precious Flowers

► **LIMITED TO JUST** 10 pieces, the latest version of Reverso One Precious Flowers, first introduced in 2021, is Jaeger LeCoultre's labour of love. The immersive decoration requires three immensely time-consuming techniques—enamelling, gem setting, and lacquer. Setting 409 diamonds alone takes 45 hours. The flowers are created using an enamelling technique that requires no fewer than five stages and several firings at 800°C in the oven. The black laquered pieces are also applied by hand, elevating this watch to art.

Bulgari Serpenti Aeterna

► **BVLGARI HAS LAUNCHED** its iconic Serpenti watch in a new version called Aeterna. Since 1948, the Serpenti collection has consistently reinvented itself, whether as tubogas—supple and coiled around the wrist—or as housing a tourbillon or holding a record in miniaturisation. Now it comes in a new avatar like a bangle. Bulgari has unveiled Serpenti Aeterna in rose gold, adorned with diamonds, as well as a high-jewellery interpretation in fully pavé-set white gold. Precious gemstones illuminate the dial, extending along the spine to the very tip of the tail. On the white gold version, oversized gems further create a striking effect. In the Chinese Year of the Snake, the Serpenti Aeterna has its eyes set on that market.
