

ROLEX Oyster Perpetual Deepsea

If you believe that all that glitters is gold, especially when deep-sea diving, Rolex has unveiled the Oyster Perpetual Deepsea in 18-karat solid gold, especially for you. The 44-mm watch is water resistant up to 3,900 metres and sports a 60-minute graduated Cerachrom bezel insert in blue ceramic. The Rolex Deepsea is equipped with calibre 3235, a movement entirely developed and manufactured by Rolex in 2015. This self-winding mechanical movement is considered exceptional, particularly in terms of precision, power reserve, convenience, and reliability.

CHOPARD Alpine Eagle 41 XP Frozen Summit

Calling all men who like bling. After all, diamonds need not necessarily be only a girl's best friend. The Alpine Eagle 41 XP Frozen Summit combines Chopard's watchmaking and jewellery expertise. The 41-mm-diameter case, as well as the entire dial, bezel, crown, and integrated bracelet in 18-carat white gold, are set with beautifully cut diamonds. This head turner makes no compromises in terms of technical expertise, as it is empowered with Chopard's L.U.C. 96.41-L movement, with automatic winding via a micro-rotor ensuring a 65-hour power reserve.
