

PANERAI Submersible Tourbillon GMT Luna Rossa Experience Edition PAM01405

Limited to just 20 pieces, the Submersible Tourbillon GMT Luna Rossa Experience Edition PAM01405 is a special creation in terms of design. The 45-mm case is made from Carbotech, a composite material based on carbon fibre, created by the brand. Notably lighter than titanium and ceramic, Carbotech's uneven matt black surface lends every singular watch a slightly different appearance. The watch is equipped with 300-metre water resistance, a 24-hour GMT function, and a night and day indication, catering to the needs of the modern traveller.

PRICE: On Request

It will not be available in India, but enquire at Panerai boutiques globally

MONTBLANC Star Legacy Orbis Terrarum Around the World in 80 Days

Inspired by the 1872 classic *Around the World in 80 Days* by Jules Verne, Montblanc's latest offering is crafted to accompany adventurers on their journey around the globe with its in-house world time complication that indicates 24 time zones at a glance. The dial depicts the world map as seen from the North Pole. The key cities as referenced in the book are represented by gold dots, while the route itself is mapped out with 80 gold dashes. Once set, you only have to press on the pusher located at eight o'clock until the reference city is at the top. The hour and minute hands will automatically synchronise to indicate the time in the city of choice.

PRICE: €7,800
