Q&A WITH SUMIT GUPTA AND NEERAJ KHANDELWAL, FOUNDERS OF COINDCX

Over the past six years, CoinDCX has cemented its position as India's leading crypto exchange, navigating through market cycles and regulatory challenges with resilience and innovation. Next, the company has set its sight to be a global web3 powerhouse. With a laser focus on solving the user experience problem inherent in Web3, CoinDCX is gearing up to revolutionize the way people interact with decentralized technologies. *Sumit Gupta and Neeraj Khandelwal, the visionary founders of CoinDCX, offer their perspectives on how the company is primed to lead the charge in shaping the future of Web3.*

Q Congratulations on CoinDCX's 6th anniversary! Looking back, what have been the key milestones in CoinDCX's journey over the past six years?

Sumit Gupta: Thank you! It's been an amazing journey. Our story is similar to many other successful tech and finance start-ups. We started small and have grown into one of the leading exchanges of India.

Looking back, one of our biggest achievements has been making crypto investing easier for everyday people. This has helped us attract over 1.5 crore Indian users to our platform. We're constantly innovating and building new features to

make their experience even better. Our CoinDCX app offers a one-stop shop for everything crypto, including advanced trading tools, Crypto SIPs for regular investing, and even options for earning passive income.

Neeraj Khandelwal: We didn't stop there. We wanted to give our users even more investment opportunities, especially in the DeFi space. That's why we introduced the Okto self-custodial wallet. Okto allows users to seamlessly trade over 20,000 tokens on various DeFi chains like Ethereum, Base, Polygon, Binance Smart Chain, and Arbitrum etc.
