SOURCE REPORTS

from sectors like technology, banking, financial services, and insurance (BFSI), and manufacturing are diversifying into India to insulate against risks in Europe, China or Eastern Europe.

"GCCs offer a concrete buffer against economic instability and geopolitical risks, enabling companies to maintain operational continuity and access vital resources even amidst severe domestic challenges. More than just cost centres, the country's GCCs are evolving into strategic hubs that are not only redefining the Indian corporate landscape but also influencing global business dynamics," says Srikanth Srinivasan, Vice Presi-

dent, and Head, Membership, and Outreach, Nasscom.

Just one look at the data on office leasing is enough to see the pace at which the GCCs are expanding. As per ANAROCK Research's data on Indian office markets, the top seven cities witnessed gross leasing of over 141.43 million square feet (mn sq ft) in 2023 and 2024. Of this, GCCs alone leased 52.88 mn sq ft, around 37% of the total.

Bengaluru remained on top with GCCs leasing around 24 mn sq ft of gross office space (46% share). Hyderabad was a distant second with GCCs leasing over 10.06 mn sq ft, accounting for nearly 19% of the

total space leased by these centres in the top seven cities. In Chennai, GCCs leased about 5.29 mn sq ft. Of this, around two mn sq ft was leased in 2023 while nearly 3.29 mn sq ft was leased in 2024, a 64% annual rise.

Likewise, GCCs leased about 5.28 mn sq ft. in Pune. Of this, 2.1 mn sq ft was leased in 2023 while nearly 3.18 mn sq ft was leased in 2024, a 52% annual rise.

Peush Jain, MD-Commercial Leasing and Advisory, ANAROCK Group, in an earlier note said, "Union Budget 2025-26 further strengthened the government's commitment to attracting GCCs in India by announcing the in-
