IN FUTURE WE TRUST

- A fat order book augurs well for revenue growth

have more than ₹2,000 crore on our balance sheet, and for the fourth quarter, recorded our highest-ever profit in a decade,” he adds.

Analysts tracking Suzlon are a lot more optimistic today. “They are a global leader with around 20.9 GW installed in 17 countries apart from holding the largest share in India at around 15 GW. Suzlon is well-placed to benefit from India’s target of 100 GW installed wind capacity by 2030,” says Abhishek Nigam, Senior Vice-President & Institutional Research Analyst (Oil & Gas, Utilities), Motilal Oswal Financial Services. To him, a net cash position allows the company to invest in growing the business. “Plus, all-time-high order book and healthy delivery pipeline underpin visibility on earn-

SUZLON’S ABILITY TO PARTICIPATE IN PSU TENDERS ENHANCES REVENUE VISIBILITY

ings, with expected Ebitda compound annual growth rate of 47% over FY25-27.”

One visible change today is the approach to mergers and acquisitions (M&As). Soon after the IPO in 2005, Suzlon had joined the cross-border acquisition frenzy.
