

SPECIFICATIONS

Display 6.36-in AMOLED, 2,670 x 1,200 pixels, peak brightness of 3,200 nits and 1-120Hz refresh rate

Processor Qualcomm Snapdragon 8 Elite chipset

Memory and Storage 12GB or 16GB of LPDDR5X RAM, with storage options of 256GB, 512GB and 1TB UFS 4.0

Rear Cameras Triple set-up featuring a 50 MP primary sensor with optical image stabilisation, a 50 MP ultra-wide lens, and a 50 MP telephoto lens

Front Camera: 32 MP

Battery 5,240 mAh battery with 90W wired and 50W wireless charging

Operating System: HyperOS 2 based on Android 15

Build and Dimensions: Aluminum chassis, measuring 152.3 x 71.2 x 8.08 mm and weighing 191 grams

Xiaomi's HyperOS 2.0, based on Android 15, offers robust customisation, promising four OS upgrades and six years of security updates. However, its AI-driven features, powered by Google Gemini, fall short of Samsung's slicker integration.

Photography remains Xiaomi's USP. The Leica-backed triple-camera array, each boasting 50MP sensors, delivers impressive versatility. The telephoto lens (2.6x zoom) captures stunning portraits and detailed zoom shots that rival flagship standards. Low-light performance, though slightly softer than Google's Pixel 9, impresses. The front-facing 32MP camera produces excellent daytime selfies, though performance dips slightly in dim lighting.

A Mid-Range Rebel

► **THE MID-RANGE** smartphone market is drowning in sameness. Brands compete on specs and price, often leaving personality behind. The Nothing Phone (3a) Pro is an attempt to make mid-range phones exciting again.

Nothing sticks to its signature design language, refining it with a bolder camera module and a polished layout. The phone has a solid build, though the polycarbonate frame, instead of an aluminum one, makes it feel less premium than the Nothing Phone (2).

The 6.77-inch AMOLED panel is one of the best among its peers, with 120Hz adaptive refresh rate and 3,000 nits peak brightness. The colours are punchy, and HDR10+ support enhances streaming content. Stereo speakers enhance the

NOTHING PHONE (3A) PRO

₹29,999

The Nothing Phone (3a) Pro isn't the most powerful phone in its class, but delivers a polished experience

experience, though they aren't the loudest in the segment.

The device is powered by Snapdragon 7s

Gen 3, paired with 8GB or 12GB RAM. It's not the fastest chip in the mid-range space, but Nothing's software optimisations ensure smooth performance in daily tasks. The 50MP main camera delivers sharp, natural-looking images with great dynamic range. Night Mode helps in low-light situations, though results lag those delivered by the Pixel 7a.
