

Leaders – Powering the 5 Trillion Dream

Saifee Hospital is a 250 plus bedded multi-specialty tertiary care hospital with state-of-the-art technology and a reservoir of highly experienced clinicians. Our facility excels at performing advanced healthcare operations including high end procedures like HIPEC and PIPAC along with robotic surgeries, cochlear implants, KTR (Kidney / Renal transplant), Liver transplant, high end reconstructive surgeries, high end retinal and corneal work, complex paediatric robotic surgeries and many other complex medical procedures are forte of our hospital.

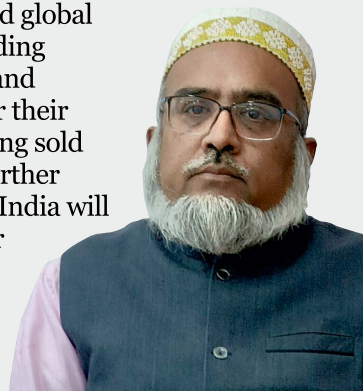

At Saifee Hospital, we emphasize our commitment to innovation and technology. By embracing cutting-edge medical technologies, implementing advanced diagnostic tools, and staying at the forefront of medical advancements, the hospital positions itself as a leader in providing state-of-the-art healthcare solutions.

Saifee Hospital has grown by leaps and bounds based on patient trust in last 5 years. Patients flock here to avail of several unique services available at only few select medical centers in the country. To mention a few, Saifee Hospital boasts of performing more than 1200 complex robotic surgeries including those for pancreatic cancers (Whipples), Liver, Thymus and trans-oral robotic surgeries using a Da Vinci Surgical Robot which has several advantages over the conventional procedures. Also it is the centre with largest series of patients in Western India for Hyperthermic Intraperitoneal Chemotherapy (HIPEC) which is the only treatment option for advanced cancers of the abdomen and peritoneum. Another feather in its cap is the availability at the hospital of a High dose radioactive therapy unit for Thyroid cancers. Saifee

India's healthcare sector powered by technology and highly skilled manpower is poised to fuel the growth of India towards a 5 trillion dream economy for India. The Indian healthcare sector and its expert medical manpower has proved its prowess on the global map on account of which not only the countries and the communities of developing societies but even the developed nations look towards getting their population treated in India. The reason for this being, the ease of getting treated without any massive delays. India has embraced global healthcare technologies and all the leading healthcare technology manufacturers and providers are looking towards India for their business and having their products being sold in India. On account of this, if this is further supported by good governing policies, India will become an unstoppable destination for global healthcare in time to come.

— Huzaifa Shehabi, CEO Saifee Hospital.
