

Powering India's \$5 Trillion Dream: Shrivats Singhania's Sustainable Vision for Udaipur Cement Works Limited

Shrivats Singhania
Director & CEO
Udaipur Cement Works Ltd

As India surges toward a \$5 trillion economy, cement fuels its foundation—building highways, cities, and dreams. At the helm of Udaipur Cement Works Limited (UCWL), a pivotal arm of JK Lakshmi Cement, Shrivats Singhania is redefining this industry's role in nation-building. A dynamic leader blending the JK Organization's 140-year legacy with cutting-edge innovation, Mr. Singhania is driving sustainable growth that powers India's ambitious future. His journey, rooted in purpose and propelled by vision, exemplifies leadership that transforms challenges into opportunities.

A Legacy of Purpose

Shrivats Singhania, carries forward the Singhania family's commitment to excellence as the son of Smt. Vinita Singhania, Chairperson and Managing Director of JK Lakshmi Cement. Since becoming Director & CEO of UCWL six years ago, he has transformed

the company into a torch-bearer of sustainability and scale. "Growth must serve a higher purpose," Singhania says. "At JK Lakshmi Cement, we're building India's infrastructure while safeguarding its environment."

Under his leadership, UCWL doubled its cement capacity to 4.7 million tonnes per annum (MTPA) and clinker capacity to 3 MTPA in 2023, posting a net profit of ₹12.15 crore in Q2 FY24. These milestones reflect Singhania's strategic foresight, positioning UCWL to meet India's projected cement demand of 800 MTPA by 2030, driven by infrastructure and housing schemes.

Sustainability as a Strategy

Cement, contributing 5–6% of India's carbon emissions, faces a pivotal moment. Mr. Singhania embraces this challenge, making UCWL a pioneer in green manufacturing. A 3.75 MW floating solar plant at Daroli Mines—Rajasthan's first in the cement sector—alongside an 11.25 MW solar plant and 15 MW waste heat recovery system, powers over 50% of UCWL's operations with renewables, cutting 85,000 tonnes of CO₂ annually. Innovations like Portland Pozzolana Cement, using fly ash to reduce clinker, and alternative fuels like biomass further lower emissions.

UCWL's particle size distribution technology delivers 10% more volume per kilogram, enhancing strength and sustainability. These efforts earned UCWL the Fastest Growing Cement Company award (Indian Cement Review) and recognition as a Top 10 Leader (Industry Outlook 2023). By joining the United Nations Global Compact in 2023, UCWL aligns with global sustainability goals, reinforcing JK Lakshmi Cement's commitment to India's net-zero target by 2070.

Leadership for Tomorrow

Mr. Singhania's philosophy balances

tradition with transformation. He leverages Industry 4.0 tools data analytics, automation to optimize operations, while an overland belt conveyor saves 1.5 million kg of emissions. As a family business leader, he embeds values of integrity and community, fostering employee wellness and social initiatives. "Leading a family business is about trust across generations," he says.

His vision extends to AI-driven agility and carbon capture technologies, ensuring UCWL and JK Lakshmi Cement remain leaders in a consolidating market. With a 10–12% demand growth forecast this election year, Singhania's focus on premium brands like Platinum Supremo and a robust distribution network strengthens UCWL's market presence.

Takeaways for Leaders

Singhania's journey offers lessons for powering India's \$5 trillion dream:

- **Innovate with Purpose:** Blend technology and sustainability to drive impact.
- **Honor Legacy:** Build on tradition while embracing change.
- **Invest in People:** Empower teams to fuel innovation and loyalty.
- **Think Long-Term:** Strategic investments ensure enduring success.

Building India's Future

As India builds its \$5 trillion future, JK Lakshmi Cement, through UCWL, stands tall. Shrivats Singhania's leadership—visionary, sustainable, and inclusive—ensures every bag of cement lays the foundation for a stronger, greener nation.

UCWL's Impact

- **Scale:** 4.7 MTPA cement, 3 MTPA clinker capacity.
- **Green Innovation:** 50%+ renewable energy, 85,000 tonnes CO₂ saved yearly.
- **Accolades:** Fastest Growing Cement Company (Indian Cement Review).
- **Vision:** Supporting India's 2047 development goals.
