

achieved 49% reduction in specific Scope 1 and 2 emissions, categories of greenhouse gas emissions, in the automotive sector, compared to the FY19 baseline. "Our Tier 1 suppliers are aligned with our Supplier Code of Conduct, which upholds environmental responsibility and the health, safety, and dignity of workers. Furthering this commitment,

we implemented a Sustainable Green Supply Chain Management Policy to promote ecofriendly practices and a Conflict Minerals Policy to ensure ethical sourcing," notes Jejurikar.

Another important milestone in M&M's ESG journey is receiving the GNCAP (Global New Car Assessment Programme) certification across its models. "We design vehicles that mi-

nimise environmental impact while prioritising occupant safety. By continuously meeting evolving GNCAP benchmarks, we have integrated advanced safety technologies such as electronic stability control, side curtain airbags, and pedestrian protection systems," Jejurikar says. These have helped strengthen consumer trust and reinforced the company's promise of 'Rise for Good,' enabling customers to make informed and responsible choices.

According to Jejurikar, a dedicated 'Vehicle Safety Council' ensures compliance with global standards like GNCAP, Bharat NCAP, and Euro NCAP. Investment in advanced crash test labs and simulation centres validates real-world safety performance, while close collaboration with Tier-1 suppliers guarantees critical components meet strict quality benchmarks.

DISCLOSURE AND TRANSPARENCY ETHOS

The Mahindra Group is replicating the auto division's sustainability model across its other units, too. "As part of our 'Planet Positive Framework', we have rolled out a group-wide sustainability policy and the 'Sustainability Mandate', reflecting our ambition to become a global ESG leader. Our 'Centre of Excellence for Sustainability' plays a key role in aligning manufacturing leadership with sustainability champions throughout all units," says Jejurikar.

Abanti Sankaranarayanan, Executive Vice President for Public Policy at Mahindra & Mahindra, says the disclosure and transparency ethos of the group stems from a very deeply embedded commitment to responsible business practices.

Sankaranarayanan says there are three benefits that accrue from the extensive disclosure M&M makes. The first is that it is able to clearly put
