

*Maharashtra Govt and stakeholders to empower MSMEs with policy, regulatory, and awareness support for a sustainable India.” said **Mr. Vivek Saraogi, Chairman & Managing Director.***

Ms. Avantika Saraogi, Executive Director, BCML opined, “Today, we launched more than a brand - we introduced Bioyug, a movement towards a bio-based, low - carbon future. Rooted in sustainability and circularity, it champions plant-based materials like PLA and uplifts India’s agri - value chain, especially sugarcane farmers in UP. While the foundation stone was laid by Hon’ble CM Yogi Adityanath Ji in Uttar Pradesh, the brand was formally launched by Hon’ble CM Devendra Fadnavis Ji in Maharashtra - two powerhouse states with the potential to lead India’s PLA revolution”

The event hosted four engaging plenary sessions, bringing together leaders from government, industry, and academia to discuss how India can scale bio-based materials through policy reform,

innovation, public awareness, and MSME empowerment. Notable speakers included Dr. Alka Sharma, (DBT) GOI, Dr. Smita Mohanty, Principal Director (Sr. Principal Scientist) CIPET - LARPM, Dr. Sunil Pandey, Director Circular Economy and Waste Management TERI, Ms. Aruna Vahini, Packaging Development Britannia Industries Limited, Dr. S.K. Nayak, Chief Advisor, Bioyug, & Former Director General CIPET & notable others. Leading biopolymer value chain companies such as VAP 3D, Ecopak, Deltora Biopolymers Pvt. Ltd., RM Biotech, SKYi Fkur Biopolymers Pvt Ltd., Sunsheid Biotech LLP, SSG consultancy services, Ecovate Ventures Private Limited, Konkan Speciality Polyproducts Pvt. Ltd., Steer Engineering Pvt. Ltd., Sunny Enterprises, Natur Tec India Pvt. Ltd., Greendot Biopak Pvt Ltd, BASF INDIA, ICPA, Plantstiks International Private Ltd. participated as exhibitors at the launch.

Hon’ble CM, Maharashtra Mr. Devendra Fadnavis mentioned in his address to the audience that Maharashtra, is a key sugarcane-producing state and a major hub for the packaging industry,

is uniquely positioned to both consume and champion bioplastics. “We need to support innovation through cross-sectoral partnerships. Balrampur Bioyug is an example of the kind of industrial transformation we wish to promote,” he said.

One of the most exciting innovations of the day was the unveiling of **‘Bioyug on Wheels’**, a mobile bus aimed at driving grassroots awareness about PLA. Designed as an immersive exhibit, the vehicle will travel across various locations showcasing a wide range of PLA application ranging from packaging, food service ware, bio medical & others, bringing in live demonstrations, consumer interaction, and educational displays to bring PLA out of technical textbooks and into people’s lives.

Forging Ahead: Accelerating the Journey from Vision to Impact

Balrampur Bioyug isn’t just ticking ESG boxes. It aims to **set benchmarks** for Indian manufacturing. PLA production is expected to **cut lifecycle carbon emissions by 68%** versus traditional plastics - a game -changer in India’s 2070 net-zero roadmap.
