

crucial role of digital solutions in bridging the access gap, stating, "In India, particularly in urban and semi-urban areas, digital health is quickly bridging the access gap for young, working women."

The IMARC Group, a research platform, estimates that the Indian women's health app market alone generated ₹1,800 crore in revenue in 2024 and is projected to reach ₹5,800 crore by 2030, with a compound annual growth rate (CAGR) of 19.8%. Singh further notes the increasing prevalence of "virtual therapy sessions, wellness programmes, and other tailored offerings."

Another area gaining momentum is menopause. A 2021 study published in the Indian Journal of Endocrinology and Metabolism indicates that over 20 million women in India reach menopause annually, with an average age of 48. There has also been an interest in hormone replacement therapies and natural supplements aimed at managing menopausal symptoms.

Complementing pharma company's initiatives, government schemes are also playing a crucial role in boosting women's health. The Menstrual Hygiene Scheme under the National Health Mission has significantly improved access to sanitary products, particularly in underserved regions. Simultaneously, the Anaemia Mukta Bharat campaign, targeting iron and folic acid deficiencies, has catalysed growth in fortified foods and micronutrient products. Public platforms like Tele-MANAS and the National Mental Health Programme are also expanding mental health support.

INVESTMENT RUSH

This significant market potential and the growing awareness of women's specific health needs are attracting increased investor interest.

TRACING THE MARKET

● Reproductive health management accounted for the largest share of India's women's health market in 2024 at 26%, followed by maternal care at 22%

The Covid-19 pandemic served as a catalyst, sparking a wave of strategic acquisitions and investments within the sector. In 2024, Mankind Pharma significantly strengthened its position in gynaecology and reproductive care through the ₹13,630 crore acquisition of Bharat Serums and Vaccines, enhancing capabilities in fertility and hormone-based treatments. The same year also saw Viatrix divest its oral and injectable contraceptive business to Spain-based Insud Pharma in a substantial \$1.2-billion global transaction. In 2020, Cipla expanded its women's health and OTC portfolio by acquiring

four nutraceutical brands from Wanbury.

The fertility sector also witnessed significant investment, with private equity firm BPEA EQT acquiring a 60% stake in the Indian fertility clinic chain Indira IVF in a ₹9,000-crore deal in 2023.

More recently, the sexual wellness market saw further investment, with That Sassy Thing, a women-first brand, raising ₹6 crore in seed funding led by Inflection Point Ventures.

Analysts also see value in the sector. Pharmaceutical analyst Salil Kallianpur points out that the
