

Swiss packaged food major Nestlé opened its first Nespresso store in Delhi's Select Citywalk mall, Merchant decided it was time to up the home brewing game. He treated himself to the Lattissima One coffee machine for ₹34,500, which will give him cappuccinos, lattes and espresso macchiatos at the touch of a button.

Home brewing of coffee is, of course, not new. It was way back in 1986 that Nestlé launched its game-changing Nespresso capsule system, revolutionising espresso consumption in homes, offices, and even Michelin-starred restaurants. Today, more than 14 billion Nespresso pods are sold every year, generating over \$7 billion in sales annually. And weren't we all brewing coffee at home much before the Baristas and Starbucks of the world opened a café on every corner? Among the estimated two billion cups of coffee consumed every day globally, more than ever are being prepared at home with premium pods, specialty beans and high-end equipment.

In India, the coffee culture is undergoing a remarkable transformation. Once overshadowed by tea, coffee has now become an integral part of urban lifestyles, fuelled by the rise of specialty, artisanal and premium coffee. The Indian coffee market is projected to reach \$1.2 billion by 2032, growing at a CAGR of about 9.87%. The coffee machine market is projected to reach \$370.3 million by FY32, from \$194.4 million in FY24, growing at a CAGR of 8.39% from FY25 to FY32, per a market research firm.

Little wonder established players such as coffee chain Barista have also jumped on to the home-brewing bandwagon. Barista has launched coffee capsules priced at ₹500 for a pack of 10 and a coffee machine priced at ₹15,999.
