

RESEARCH & DEVELOPMENT

the strong research and development department of SBL initiates new researches and development of new products. What distinguishes SBL on India's homoeopathic scene is its "non-negotiable focus on quality". Any formulation introduced by SBL is subjected to exhaustive clinical trials before launching.

The key focus areas of R&D are:

- (a) Clinical trials on new formulation and also on partially proved medicines.
- (b) Proving (basic research) – proving of established Indian herbs to explore their homoeopathic usage.

Potentiation (manufacturing with homoeopathic principles) of certain allopathic products having side effects to see its curative effects.

- (c) To explore the possibilities of improving and upgrading existing products.

BUSINESS FOCUS

SBL is unquestionably numero-uno company in India and way ahead over any other competitor operating in the Indian market.

To further augment its status, SBL is carrying regular expansion and introduction of new products based on research and clinical trials alongwith maintenance of stringent quality control at par with top companies of the world. SBL is now focusing on export market in developed as well as developing countries to achieve its vision as a global player.

THRUST AREA (S)

SBL was established in 1983 with manufacturing facilities at Sahibabad in collaboration with Laboratories Boiron of France. The manufacturing capacities were expanded with two more state of the art units at Jaipur and Haridwar where over 11,000 remedies are manufactured. SBL has largest turnover in India and now establishing sizeable exports in developed as well as developing countries. SBL has in place detailed plans to cross turnover of Rs. 100 crore from the current estimated turnover of approximately Rs. 75 crore (in the estimated organised sector of industry turnover of Rs. 350 Crore.)

CHALLENGES AHEAD

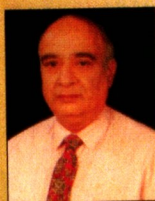

SBL has taken the challenge to make homoeopathy the most preferred choice of masses to provide complete treatment for various ailments. SBL is focusing now to expand operations across the globe and has envisaged to establish infrastructure and manufacturing facilities, wherever possible, in various countries including developed countries with the objective of becoming one of the major player in homoeopathy industry in the world.

Microbiological test in process

SBL's Strengths

- The first homoeopathic company in India with ISO 9001:2000 certification awarded by the TUV Nord Certification Body, formerly known as RWTUV Anlagentechnik GmbH of Germany.
- The first homoeopathic company to acquire GMP certification in India way back in 2002, which was again ratified in 2007 when GMP certification was accorded under the newly established norms by the Government of India.
- The only homoeopathic company in India having R&D laboratories recognised by the Ministry of Science & Technology, Government of India.
- Independent QC labs at all 3 state-of-the-art units at Sahibabad, Jaipur and Haridwar; equipped with latest hi-tech equipments including HPTCL, microbiological labs and a highly qualified manpower to make it all work.
