

FUELLING RETURNS

Is your car fuel bill burning a hole in your pocket? Consider adding LPG as a fuel option to prune your bill and boost your savings. If you drive about 30 km in a day, switching from petrol to LPG can help you save up to Rs 14.80 lakh over 25 years. Here's how:

Cost of petrol used per day	Rs 120
Cost of LPG used per day	Rs 80
Savings per day	Rs 40
Monthly savings	Rs 1,200

If that money was invested in a scheme that earned 10% a year, it would grow to Rs 14.80 lakh in 25 years

And we have not even factored in the benefit of a cleaner environment

LUNCH BRAKE

Is your lunch bill eating into your wallet? Start bringing lunch from home instead of eating out. This simple lifestyle change can help you save Rs 19 lakh over 25 years. Here's how:

Daily cost of eating out	Rs 70
Working days per month	22
Monthly cost	Rs 1,540

If that money was invested every month in a scheme that earns 10% annually, it would grow to Rs 19 lakh in 25 years.

And we have not even factored in the imminent rise in prices which would increase your savings or the immeasurable health benefit of eating wholesome homemade food just as we have not taken into account the marginal cost of getting a meal from home.
