

midfin360: Powering Personal Finance, Driving India's Economic Future

"A next-gen fintech platform designed to support individual financial growth and national economic progress through smart, inclusive, tech-driven investing."

Anbarasan Venkatachalam
Founder & Director
Midfin360

India is in the midst of a defining phase of economic growth aiming to become a \$5 trillion economy by 2027. But behind every ambitious GDP figure lies a

simple truth: a nation's progress begins with financially empowered individuals and businesses. That's where midfin360 comes in. Built to support this progress, midfin360 brings together Mutual Funds, Portfolio Management Services (PMS), Alternative Investment Funds (AIF), National Pension System (NPS), Specialized Investment Fund (SIF), Insurance, Loans, and Digital Banking into one comprehensive platform—empowering users and fueling economic momentum.

From Fragmentation to Financial Clarity

Despite India's rapid adoption of digital finance, most individuals still manage their wealth across scattered platforms. Mutual funds on one app, fixed deposits at a bank, insurance from a different provider, and PMS or NPS via separate sources. This fragmented experience creates financial blind spots, delays decisions, and often leads to missed opportunities. Platforms like midfin360 respond to this demand by bringing together all major components of personal finance into a single, cohesive view. Trusted by industry advisory professionals, the app balances robust

functionality with ease of use—making wealth management accessible, efficient, and secure for investors of all kinds.

Key features include:

- Easy onboarding with KYC, PAN, and Advanced Security
- Multi-Asset Portfolio Management (MFs, PMS, SIF, digital banking & more)
- Goal-based investment planning
- Tax optimization and reporting
- Real-time net worth tracking
- Seamless App Experience – Designed for All Investors

Empowering Citizens, Strengthening the Economy

India's march toward becoming a \$5 trillion economy depends not only on big reforms but also on widening the base of financial participation. Here's how midfin360 contributes to that vision:

Bridging the Savings Gap

With India's household savings rate dropping to 18% of GDP in FY24 from over 23% a decade ago (RBI data), efficient use of existing funds is vital. midfin360 enables smarter allocation into productive assets like mutual funds and NPS, supporting capital formation
