SOURCE COMPANY ANNUAL REPORTS, PRESS RELEASES

treatment for relapsed multiple myeloma that directs the patient's own engineered T-cells to attack cancer. The Phase II trials are underway. "Aurigene Oncology also has several first-in-class and small molecule oncology assets under development. Strategic partnerships, such as our collaboration on Pembrolizumab (Keytruda), strengthen our biosimilars pipeline," says the spokesperson. UK pharma giant GSK entered the Indian oncology market in August 2025 with two advanced therapies: Jemperli (Dostarlimab) and Zejula (Niraparib). A company spokesperson says Jemperli and Zejula are competitively priced and aligned with other immuno-oncology therapies in the market. "These therapies address a critical unmet
