

- ▶ Items like utensils, gongs, tractor parts, and sewing machines face an inverted duty structure under GST 2.0
- ▶ This necessitates MSME units to claim the differential amount in refunds, which takes a long time and blocks working capital
- ▶ CTRI suggests that 99% of MSMEs be rid of any compliance burden
- ▶ FISME has suggested that input items at 18%, which are used in the manufacturing of items in the 5% rate bracket, may be moved to a new concessional rate of 8%
