OPTOMA ZK810 PROJECTOR

► This 4K laser projector is a standout choice for luxury home theatres and other high-end installations. With a stunning 8,200 lumens of brightness, this powerhouse is built for environments with high ambient light, such as expansive living spaces or corporate venues. This device combines advanced digital light processing technology with true 4K resolution to produce crisp, vibrant images, while HDR compatibility ensures an exceptional viewing experience with deep contrasts and vivid colours. It blends cutting-edge technology with a sleek design that complements luxurious interiors. The Optoma ZK810 is an investment in ultimate visual performance.

PRICE: \$12,000 (approx.)
