DRIVEN BY TECHNOLOGY

This increased customer interest for EVs is also aided by the fact that most EV luxury cars come equipped with the latest, most cutting-edge technologies.

According to Dhillon, luxury EVs often offer instant torque, resulting in quick acceleration and smooth, silent rides, enhancing the driving experience in ways traditional vehicles cannot. "The Audi RS e-tron GT is India's first electric supercar and the most powerful Audi ever made. It goes from 0-100 km per hour in just 3.3 seconds," says Dhillon. When fully charged, the car has a range of 401-481 km, he adds.

Plus, carmakers are fitting EVs with software applications that are adding glamour to electric cars. For example, Mercedes-Benz India, the country's largest luxury carmaker, is betting big on connectivity features. According to Santosh Iyer, MD & CEO of Mercedes-Benz India, since more time is being spent inside a car, connectivity has become a top demand.

"Customers' experience has significantly enhanced with the 'Mercedes me' app, and our digital extras and connectivity features are now integral parts of comfort, convenience, and safety appointments in our vehicles, making them highly individual and desirable," Iyer told *BT* recently.

Mercedes-Benz India currently has six luxury EVs in In-
