► **FROM 'ELEPHANT' TO 'horse'**— Reserve Bank of India (RBI) Governor Shaktikanta Das' outlook on inflation seems to have seen a shift. What was 'slow moving' is now 'agile' and needs to be kept on a tight leash. What brought about this shift in analogy? According to retail data for September, retail inflation has seen a 5.5% year-on-year jump on the back of an increase in vegetable prices.

"The RBI governor stressed that though the risk of inflation is diminishing in the medium term, multiple factors could impact it in the short term. This stance indicates that the RBI has turned cautious
