

PANERAI

SUBMERSIBLE LUNA ROSSA CARBOTECH PAM01563

► **Limited to only** 37 pieces in an ode to the 37th America's Cup, a sailing competition, this timepiece from Panerai symbolises technical watchmaking. The watch's case and the rotating bezel are made of Carbotech, a special material created by Panerai by compressing carbon fibre sheets at a precise temperature and high pressure along with a superior polymer. At the heart of PAM01563 is the automatic P.900 movement that provides a three-day power reserve. In an e-commerce exclusive, the watch was made available for only 24 hours resulting in all pieces being sold out. Serious collectors need to try the secondary market.
