

Madan Mohan Fomra: Leading Cabcon's Electrifying Journey Toward Innovation and Growth

The indefatigable Madan Mohan Fomra has transformed Cabcon into a powerhouse in the manufacturing of electrical conductors and cables. His commitment to innovation and sustainability has propelled the company's growth, making it a key player in India's electrification and infrastructure sectors.

Madan Mohan Fomra
CMD, Cabcon India Limited

Mr. Madan Mohan Fomra, the visionary leader and driving force behind Cabcon, has played a pivotal role in transforming the company into a leader in the manufacturing of high-quality electrical conductors and cables. With a thorough understanding of the power and infrastructure sectors, Mr. Fomra's leadership has been marked by his unwavering commitment to excellence, innovation, and sustainability. Under his guidance, Cabcon has emerged as a key player in India's electrification and infrastructure development, contributing significantly to the nation's progress.

Founded in 1991, by Late Shree Ballabh Ji Fomra, Cabcon's initial production capacity of 1,500 TPA has since expanded to an impressive 60,000 TPA. This growth stems from Fomra's strategic approach to modernizing facilities and scaling production to meet the industry's evolving demands. Today, Cabcon is regarded as one of the largest and most trusted suppliers of power cables and aluminium conductors in India with a robust overseas presence.

Fomra's emphasis on technological advancements and expanding Cabcon's product offerings. The company's diverse portfolio now includes Low Tension Power Cables, Control Cables, and Aerial Bunched Cables, among other high-performance aluminum conductor such as HTLS

and AL59 Conductors. This product evolution has enabled Cabcon to meet the stringent requirements of power transmission and distribution, earning the trust of clients both in India and internationally.

Cabcon's commitment to quality and sustainability is reflected in the company's numerous certifications, including ISO 9001:2015 for Quality Management, ISO 14001:2015 for Environmental Management, and ISO 45001:2018 for Occupational Health and Safety. These certifications, along with an 'A' credit rating from ECR, underscore Mr. Fomra's dedication to upholding the highest standards in Cabcon's operations. As Mr. Fomra puts it, *"At Cabcon, we believe that innovation and sustainability go hand in hand. Our mission is to power progress by delivering quality solutions that not only meet today's needs but also build a better future for generations to come."*

Beyond manufacturing, Fomra has expanded Cabcon's capabilities to offer turnkey solutions through its Engineering, Procurement, and Construction (EPC) division. Notably, the company successfully electrified 450 villages in Bihar's Katihar District, a project recognized by the Chief Minister of Bihar. This achievement further solidifies Cabcon's reputation for delivering timely and high-quality projects.

Internationally, Cabcon has expanded its presence, exporting to countries like Kenya, Rwanda, and Bangladesh. Recognized as a One Star Export House by the Government of India for its strong export track record, Cabcon continues to make strides globally. Additionally, Cabcon's approval as a vendor for Power Grid Corporation of India (PGCIL) and several major EPC companies, including L&T, Adani Transmission, KEC international, KPTCL and many more, highlights its credibility and reliability within the power sector.

To enhance supply chain efficiency, Fomra led the establishment of Shreyash Aluminium and Alloys Pvt. Ltd. in 2008, ensuring a consistent supply of aluminum wire rods, a critical raw material for Cabcon's products. This vertical integration enables Cabcon to maintain strict quality control across its manufacturing processes.

The Fomra family's leadership has also been instrumental in Cabcon's growth. While Madan Mohan Fomra has been the driving force, Directors Vijay and Manish Fomra have played essential roles in scaling operations. As Cabcon looks toward the future, the next generation—Siddharth, Vatsal, and Nikhita—are poised to lead the company forward, continuing the family's legacy of innovation, sustainability, and excellence.
