

TRANSFORMING EDUCATION THROUGH INNOVATION, AI & EMPOWERMENT

Dr. Manjula Pooja Shroff's journey started in a very offbeat setting than what we perceive as today. She hails from royal lineage and grew up as a princess of a conventional royal family of Odisha. Her transformation into an outstanding leader who has changed the definition of how innovation and creativity can be used to enhance educational practices is metamorphic. Over the 3 decades since she ventured into her chosen field, she has become a relentless advocate for integrating the latest technology into education and reshaping the learning experiences to meet the dynamic demands of the future.

While Dr. Shroff has always proven her mettle as a thought leader towards bringing in progressive changes in the educational domain, her recent path breaking AI avatar and virtual clone MAYA, designed to bring advanced, interactive educational support to students, parents, and educators took the academic world by storm. This was the first of its kind AI technology used in India to offer personalised learning experiences and cater to user's unique needs.

As a commitment to all stakeholders, specially parents and teenagers, Dr. Shroff has developed the Total Parenting Solutions package, a comprehensive toolkit that includes her bestselling books Baby Steps to Big Dreams and Safe Teen Steps – Making Young Adults Cyber Secure. This package equips parents with insights and practical advice on critical issues like cyberbullying, online grooming, and digital literacy. The same kit is also complemented by an innovative generative AI solutions based digital platform "Sitting-by-Maya" addressing parental and educational concerns instantly.

Dr. Shroff has played a key role in contributing her expertise to NEP 2020 implementation. She firmly believes in doing her bit towards making a difference in Indian education. Her NEP Implementation Strategy report made a deep impact when shared widely with educational leaders and ministries across the country.

She has emphasised greatly on the role of professional development of each and every staff member and empowered each of them to develop a sense of ownership and professionalism towards the organization. She has also personally invested her time in creating self-development programmes for Conscious Living on her Shroffism page to prioritize personal growth and build self-esteem and confidence for all stakeholders; parents, students, staff alike.

Her values of sustainability for the planet and empathy towards all resonate with the same passion as do her commitments towards education, when she addresses international forums. During the 18th International Human Rights Summit at the United Nations as well as

at the COP28 Conference at Dubai she made impactful presentations towards advocating these causes. At the recent B20 Summit in Brazil, the official dialogue forum for the G20 business community, Dr. Shroff contributed to conversations about the future of work, the impact of AI, and the critical role of education in preparing future generations for global challenges.

Dr. Manjula Pooja Shroff is truly an all-encompassing edupreneur who is committed to a mission to revolutionize education and give her best. These are the exceptional and visionary leaders that the VUCA world of today needs.

Kalorex Group

Kalorex Group has been at the forefront of integrating technology into education, a testament to Dr. Shroff's forward-thinking vision. With a network of 60+ institutions, the group has empowered over 4000 educators, and shaped the futures of over 1 lakh students. Today, Kalorex operates K-12 schools including Delhi Public School, Bopal-Ahmedabad, Kalorex Future Schools, and a chain of Kalorex Pre-Schools. Reflecting a commitment to inclusivity of all students, the group also runs initiatives like Prerna and the Visamo Kids Foundation, which aim to support children with learning difficulties and uplift underprivileged youth.
