

learning. Advent is also exploring new-age businesses, having invested in KreditBee, an online lending platform. “We need businesses with scale, which are hard to find in the start-up space, and where there is scale, the valuations are not attractive.”

So, what’s next for Jalan? At the moment, she is very bullish about the manufacturing sector, and sees it as the new sunrise sector for private equity firms.

With Advent looking to invest \$5-10 billion in India over the next five years, her sharp eye will ensure the focus on growth remains strong. **BT**

Healthcare isn’t just about treating illness—it’s about healing people,” she says.

Now, she is focussed on making healthcare more accessible, affordable, and personalised. “We are developing a unified platform to integrate health data, offering a complete view of each patient’s journey. This is the future for us—using data and tech to create a seamless, one-stop solution that meets all healthcare needs,” she says. BT

TECH TRAILBLAZER

SINDHU GANGADHARAN

HARAN is an ardent believer in fitness, whether it be that of the body or that of the human mind. “A happy body fosters a happy mind,” she is fond of saying.

Planning and adaptability are other key parts of her philosophy. For her, preparation is fundamental to success

and adaptability is crucial in a rapidly-evolving tech landscape.

Although Gangadharan started her career at SAP Labs India as a software engineer 26 years ago, her career has since taken her through 18 years in Germany before returning to India in 2019 to lead Customer Innovation Services.

SINDHU GANGADHARAN

48, SVP & Managing Director, SAP Labs India; Head, SAP User Enablement; Chairperson, Nasscom

WHY SHE MATTERS

She leads SAP Labs India that has emerged as a crucial engine for the tech giant’s global AI strategy. As Nasscom Chairperson, she is focussed on shaping India’s future as a global tech leader

Now, as Chairperson of industry body Nasscom, she sees relationships as the ‘lifeblood of growth.’

Driven by curiosity, which she calls her “North Star,” she has been motivated to explore new technologies and push boundaries, a quality that has been instrumental in her role in establishing SAP Labs India as SAP’s largest R&D hub.

One of her most exciting recent contributions at SAP Labs India has been with Joule, SAP’s Gen AI assistant, which was largely developed by her teams in India. “It’s a testament to the incredible talent we’ve cultivated here,” she notes. Over the past year, her team has upskilled 50% of its workforce in AI, doubling AI talent and establishing SAP Labs India as a crucial engine for SAP’s global AI strategy.

Now, as the Chairperson of Nasscom, Gangadharan is focussed on helping shape India’s future as a global technology leader. With the tech industry being on the cusp of a major change, Gangadharan also believes that her focus will be on leveraging disruptive technologies like AI to maximise growth, while fostering innovation, creating a supportive policy environment, and strengthening India’s R&D capabilities. **BT**
