

“We run like a society, which at any point has 17-24 members. None of them are investors... It's purely not-for-profit”

AJIT PARULEKAR
DIRECTOR, GIM

“We are constantly updating our courses to prepare the students for the demanding work environment”

ANUBHAV MISHRA
PROFESSOR-MARKETING, GIM

improved from 135.9 out of 200 in 2023 to 142.9 in 2024, and that is the primary reason for the college's improved overall score this year and a jump of three spots from 27 last year. Besides, it is also in the Top 15 in terms of learning experience.

Last, but not the least, is GIM's track record in placing its students, which has stood out as its greatest strength. In a market marked by a shortage of jobs and poor placement records even of the country's leading institutes like the IITs, GIM brought 54 companies to the campus and placed all its students in 2024 with an average salary of ₹14.81 lakh per annum. The highest salary stood at ₹55 lakh per annum.

Today, GIM's total student strength is about 1,200 with 600 in each batch, and the number of full-time faculty, which includes foreign nationals as well, is close to 90—similar to the country's leading B-schools like IIM Calcutta.

GIM's leaders are in no mood to sit back on their laurels. They now plan to expand it into a full-fledged university that will offer more programmes on business management and related subjects. And expansion is already on top of Parulekar's mind. “We are in search of more land,” he tells *Business Today*.

For students like Nikita Batra, GIM has shown a path to success. Batra, who graduated with a commerce degree from Chandigarh University, says moving to the campus has turned out to be life-changing, and she cherishes the challenges it threw up of adjusting to the rigours of an MBA programme. It has sharpened her skills, like, for instance, while participating in group discussions, often held on the rooftop with a splendid view of the Ghats. That's an experience she will not forget. **BT**

But we are quite efficient [in managing the finances], and whatever surplus remains, we invest back [in the institute],” says Parulekar, who joined the institute back in 2000. He stresses its constant focus on improving the curricula as per the changing trends and business environment, and its investments in faculty and upgrading facilities as key to GIM's success.

Keeping pace with the increasingly volatile environment that is affecting all leading corporations, GIM has been agile in terms of curriculum—introducing new courses and programmes when it saw the need. In 2024, for instance, it launched an International Double Degree in Analytics with Nova School of Business & Economics, Portugal. In 2020, amid the pandemic, GIM came up with a post-graduate diploma in management (PGDM) in banking, insurance, and

financial services.

Now, it offers a full-time PGDM in big data analytics and a hybrid PGDM for working executives, while its programme in healthcare management was launched in 2013. It attracts 60 students every year and has established GIM as one of the leaders in the field. That is why Jernail Singh, a dentist from Dehradun, chose GIM to pursue a two-year full-time PGDM in healthcare management. According to Anubhav Mishra, who teaches marketing at GIM, specialised programmes such as these are in high demand. “We are constantly updating our courses to prepare the students for the demanding work environment,” he says.

Those efforts are reflected in the college's improved score on the Future Orientation metric in the BT-MDRA list. It has
