

ties,” Basu tells *Business Today*. The institute has launched an executive management programme in Dubai, with a different pedagogy focussed on the fragile Middle East.

Changing itself and its courses to remain ahead of the curve is what has helped the B-school, established in 1961, retain the top spot for years. IIM Calcutta runs two courses—Postgraduate Diploma in Business Analytics in a joint venture with IIT Kharagpur and Indian Statistical Institute, Kolkata, and a postgraduate programme focussed on manufacturing in the neo-industrial revolution. It also offers close to 100 elective subjects. “The electives reflect macro-economic changes and geopolitical developments, apart from industry trends like digital transformation. We are increasingly focussing on

AI, on how it will impact businesses,” says Basu.

The institute has introduced mandatory course components on ESG. In fact, from next year, IIM Calcutta is going to launch four inter-disciplinary courses on inclusivity, sustainability, and the challenges firms face, and on regional transformation, that require about

The latest batch comprised 39% fresh graduates, while students with less than one year of work experience formed another 18%. Engineers continued to dominate with about 73% having a B.E. or B.Tech degree. In fact, 43% of its students continue to come from IITs, NITs or BITS. The gender diversity ratio, with 32% women

- Postgraduate programme focussed on manufacturing in the neo-industrial revolution
- Courses focussed on AI and Business Management with a focus on geopolitical uncertainties

61

50 faculty members. A large pool of highly-qualified faculty is another strength that IIM Calcutta boasts of. Currently, the institute houses over 90 permanent and about 60 non-permanent faculty members.

At a time when even premier institutes like the IITs and IIMs are not immune to the ongoing job crisis and where corporate entities are cutting down on their hiring plans, IIM Calcutta has managed to shield itself. In 2024, all its 465 full-time MBA graduates were placed with an average annual CTC of ₹35.07 lakh. Its highest international CTC of ₹94.82 lakh fell short of its domestic placement at ₹1.15 crore. Consulting firms have hired the most number of graduates—40.5%—followed by product and analytics firms, finance companies, and in general management roles, among others.

students, is encouraging.

A noticeable change that is seen is the risk appetite of fresh B-school graduates, evident from their choice of tech companies, which comes with its own set of risks. The number of students choosing entrepreneurial roles has also increased. In 2024, about 21 graduates decided to launch their own ventures. “A higher number of pupils is now opting for jobs that are entrepreneurial in nature, like start-up firms,” observes Basu.

Today’s dynamic world needs students and a workforce well equipped to adapt to change. IIM Calcutta is able to inculcate exactly that, and much more. For this reason the institute has remained the defending champion. **BT**
