

AHEAD OF THE CURVE SPJIMR works with 600 NGOs and the objective is to churn out 100 managers with a focus on the development sector

three are online. Contact period refers to the time when classes or sessions are held.

The WISE Tech project, like the Y Combinator model in the US, is another interesting aspect, revolving around a technology start-up accelerator. This in-house project looks to address the challenge of scaling up businesses that, say, have secured one round of funding and need that little help to get into

the next critical phase. “There is a network of 40 VCs and the institute plays the role of a conduit to facilitate that process,” says Nagaraj.

Investments for enhancing infrastructure include a new hostel building with more than 200 rooms, a new faculty accommodation block, adding over 65 faculty residences and a state-of-the-art recreation centre with indoor

gaming facilities and food courts, among others.

The journey of studying at SPJIMR is filled with innovation, with a thrust on technology, making sure there are well-rounded students who can think smartly and are able to get the best out of the institute. Bagging a job is only one part of the story. **BT**
