

EV SALES IN INDIA

● At present, there are 20 different EV models available in the Indian market ● With 104,523 EV sales in FY24, the segment currently accounts for 2% in the domestic PV industry

Under ₹10 lakh

● In FY24, MG Comet led the below ₹10-lakh EV segment with 9,527 unit sales ● Tata Tiago, with sales of 9,452 units, was the second-most sold

MARUTI'S EV MOMENT

For years now, shareholders have been asking Maruti Suzuki, which sold close to 1.5 million units in 2023, why it does not have an EV yet even as rivals have introduced many EV models. At the 43rd AGM on August 27, when a shareholder again asked this question, Chairman R.C. Bhargava said it would roll out one in the domestic market in a few months.

“Electric vehicles are likely to be adopted gradually

over the years as the multiple challenges facing the consumers are overcome,” he said. But Bhargava said it will not roll out EV variants of all its 17-18 ICE models.

A month later, Hisashi Takeuchi, MD & CEO of Maruti Suzuki India Ltd, disclosed that the promised EV would have a range of 500 km and a 60-kWh battery. “At Maruti Suzuki, we will use all technologies to combat carbon emissions and oil consumption. We will have a high-specification EV with a range of 500 km and a 60-kWh battery. We will have multiple such products,” said Takeuchi.

Maruti Suzuki will address the car buyers’ ecosystem as it launches EVs. “We are not only going to launch the product, we are [also] going to provide a complete ecosystem for the customers who are going to be part of this EV family,” Partho Banerjee, Senior Executive Officer (Marketing & Sales), Maruti Suzuki India, said recently at a media briefing.

It reportedly plans to install 25,000 fast-charging chargers. According to Banerjee, Maruti’s research shows that 95% of EV buyers currently charge at home.

“The customers should have peace of mind while travelling... Having good infrastructure matters. We are going to come up with a holistic programme by which

CARMAKERS, EXPERTS SAY, MUST ADDRESS BUYERS’ CONCERNS ABOUT RESALE VALUE, FINANCING, AND CHARGING INFRA, WHILE DEVELOPING BUDGET-FRIENDLY MODELS
