

increasing localisation. The plan is to ultimately position it as a leading EV maker in the world's third-largest passenger car market.

Interestingly, Jindal said, things were working in tandem. For instance, in 2017, when he was preparing to take the EV leap, MG (originally a British brand) entered India with its promise of setting up a manufacturing base in the country. MG tasted early success with its first model, the Hector. And by 2019, it had completed the takeover of the erstwhile General Motors plant in Gujarat's Halol and started production in India.

Then came the pandemic in 2020. While Covid-19 hit JSW's plans, the clash between Chinese and Indian soldiers in the Galwan Valley added to MG's pain. As relations between New Delhi and Beijing soured, it put Chinese investments in India under greater government scrutiny. MG Motor India, like many other Chinese majors, received notices from the Ministry of Corporate Affairs for alleged irregularities in financial reporting for FY21. Plus, approv-
